Casing Ring Bit

'D.R.A.' Casing Ring Bit

'D.R.A.' Casing Ring Bit designed for repeated use and is made of special steel by way of Roll Forging for a longer life span.

'C.I.P.' Casing Ring Bit

'C.I.P.' Casing Ring Bit is made of rolled steel plate and designed for midway life span though not as long as that of 'D.R.A.' casing ring bit.

'Disposable' Casing Ring Bit

'Disposable' Casing Ring Bit made of rolled steel plate and has tips lesser in number and smaller in size but suitable for being thrown away by leaving behind deep in the ground with the pile after use.

'D.R.A.' Casing Ring Bit for repeated use, 'C.I.P.' Casing Ring Bit for couple of time's use and 'Disposable' Casing Ring Bit for only one time use are available according to the user's demand.

We have on hand stock ranging from 406mm to 1220mm.

Casing Ring Bit

"A" TYPE RING BIT FOR D.R.A.

The body of Ring Bit is forged special steel to enrich abrasion resistance.

Button Bit

'BUTTON BIT'

The body of this Button Bit is made of special steel to make it breakage free, and carefully screened tips out of plenty of on hand stock with various grades in accordance with the character of rocks are used which largely contribute to the life span of the entire Button Bit.

Special steel, which contains ingredient of ample nickel by which abrasion resistance has been considerably, is used for the material of bit body.

Carefully screened quality tips, out of on hand stock with various grades, are used for meeting the user's application in accordance with the character of rocks and, as a result, its life span has been considerably improved to the user's satisfaction.
